

README demos

- Author: Tim Fraser

This README discusses demos for `moves_anywhere`. See below for Frequently Asked Questions of interest.

Frequently Asked Questions

What Input Tables Can't Be Run Together?

Sometimes, if you run two custom input tables together, MOVES will reject it, telling you to only upload 1 VMT table, etc. While the MOVES graphical user interface (GUI) prevents you from making such choices, `moves_anywhere` by design has no GUI, and so such errors become possible. Here's a breakdown of what types of tables can be submitted in a single run. (This guide may be updated over time.)

- Source Type Population
 - ☐ `sourcetypeyear`
- Vehicle Type VMT (1 of the following)
 - ☐ `hpmsvtypeyear`
 - ☐ `hpmsvtypeday`
 - ☐ `sourcetypeyearvmt`
 - ☐ `sourcetypedayvmt`
- IM Programs
 - ☐ `imcoverage`
- Age Distribution
 - ☐ `sourcetypeagedistribution`
- Average Speed Distribution
 - ☐ `avgspeeddistribution`
- Fuel (any of the following)
 - ☐ `fuelSupply`
 - ☐ `fuelFormulation`
 - ☐ `fuelUsageFraction`
 - ☐ `avft`
- Meteorology
 - ☐ `zoneMonthHour`
- Roads
 - ☐ `roadTypeDistribution`
